I am out of the country but will follow by email. I may be delayed in responding but will get back to you.

Hello:

I allowed Lonestar Ecology to come to the site to evaluate the ASTs today to see if there were tanks that they may be able to use for their operations. We have 18 of the 20 ASTs empty. The only ones with materials are ST1 and ST6. I should be back from Lonestar tomorrow on which tanks they feel are in a condition that would be useful to them. I will give you guys an update as soon as I am back from Lonestar.

These Tanks belong to the Estate. It was my understanding that you guys wanted to remove these tanks off the site as quickly as possible but I need to know if this is the direction that you want to go with these tanks.

Please get back with me so we can discuss further.

Thanks

Gary Moore
